ALUMINUM PROFILE

COVER

Covers for aluminum LED profiles differ in the degree of transparency. Thanks to a conscious choice, you can plan the lighting effect, light dispersion and distribution better. Transparent covers absorb a smaller amount of light, followed by frosted, milky and opal ones.

	Transparent	Frosted	Milky	Opal
Material	PC	PC	PC	PC
Light Transmission	93%	85%	72%	60%
Coefficient Diffusion	Low	Low	Medium	High
Method of Assembly	Push In	Push In	Push In	Push In

End Cap

The end caps aims to aesthetically close the profile and additionally protect the led strips inside.
We have two types, with a hole and without a hole.

Mounting Accessories

The mounting accessories can make the installation easy and able to fix the profile tightly.
We also have two types, metal clips and transparent PC clips
